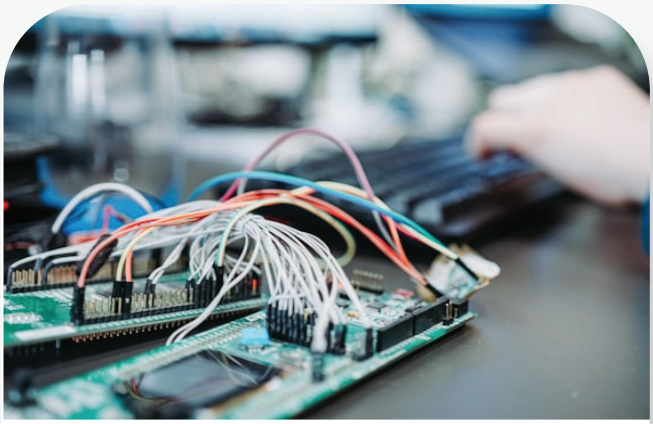
Our Solutions

Greatlane Surveillance Systems Ltd is at the forefront of environmental technology, providing state-of-the-art solutions

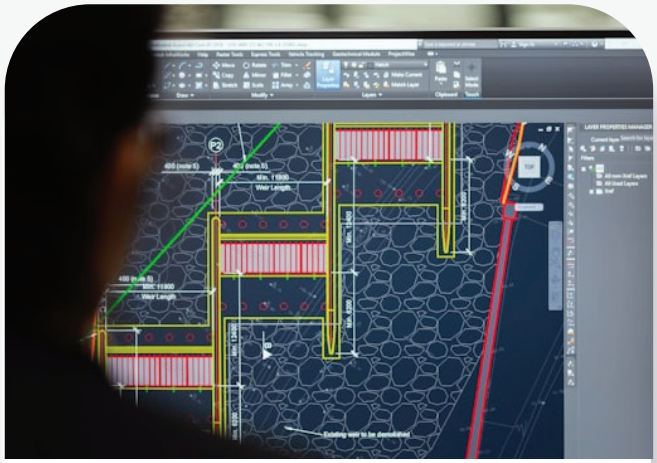


IoT Flow Meters

Real-time water monitoring with NIC integration for accurate consumption tracking and reporting.

Stack Emission Monitoring

Continuous monitoring of PM, SOx, and NOx levels to ensure industrial emission compliance.



Ambient Air Quality

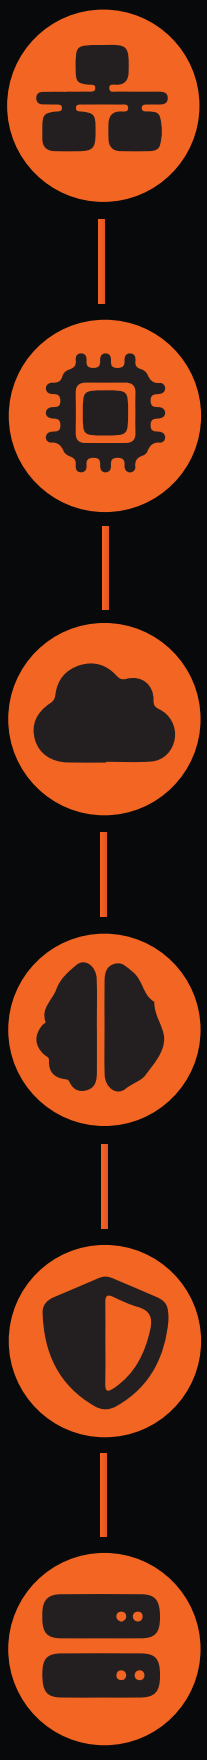
Real-time water monitoring with NIC integration for accurate consumption tracking and reporting.

PTZ Surveillance

Advanced pan-tilt-zoom cameras for comprehensive industrial security and process monitoring.

Advanced Tech Stack

Built for reliability, scale, and compliance. Our end-to-end architecture ensures seamless data flow from the hardware edge to the regulatory cloud.



IoT Sensor Networks

Connected high-precision sensor nodes for rigorous real-time field data collection across any industrial layout.

Edge Computing

Immediate on-site data processing ensuring low-latency alerts and fail-safe local control without internet dependency.

Cloud Dashboards

Centralized, scalable monitoring hubs accessible securely from anywhere, offering unified visualization.

AI Predictive Analytics

Advanced machine learning models forecasting trends and identifying potential equipment anomalies before catastrophic failure.

Encrypted Logging

Military-grade security standards ensuring your compliance logs remain absolutely tamper-proof and verified.

NIC Integration

Built-in, native APIs ensuring automated, seamless data handshakes with government and environmental regulatory portals.

Why Greatlane

Our robust technical expertise and dedication to reliable monitoring put you years ahead of compliance deadlines.

End-to-End Solutions

From initial site survey to full commissioning, we seamlessly handle all hardware, software, and regulatory setups directly.

Regulatory Expertise

Deep foundational understanding of strict CPCB and SPCB compliance nuances to ensure flawless operational reporting.

Rapid Deployment

Optimized installation cycles that get your rigorous monitoring systems fully live and calibrated without hesitation.

Prompt Support

Our dedicated experts are constantly available for remote diagnostics and local support guaranteeing high system uptime.

Spare Parts Ready

We actively maintain an extensive stock of critical hardware components to virtually eliminate operational downtime constraints.

Cost-Effective Systems

Premium, highly durable technology delivered at exceptionally competitive corporate models for industrial scaling.

Our Support & Services

Installation & Commissioning

Expert setup of all monitoring hardware and software systems.

Calibration & Certification

Regular sensor calibration to maintain regulatory accuracy standards.

Annual Maintenance (AMC)

Comprehensive service plans for peace-of-mind operation.

Remote Diagnostics

Troubleshooting and performance monitoring from our control center.

Staff Training

Empowering your team to operate and understand the monitoring data.

Spare Parts Support

Genuine components and accessories for all our installed products.
